

# MATERIAL SAFETY DATA SHEET

## Section 1 - Identification

|                     |                                                                                                                                     |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Product identifier  | Fmoc-L-4-Pyridylalanine                                                                                                             |
| Catalog No.         | AS4230                                                                                                                              |
| CAS No.             | 169555-95-7                                                                                                                         |
| Recommended use     | Laboratory research and chemical synthesis; peptide, peptidomimetic and medicinal-chemistry synthesis as applicable.                |
| Restrictions on use | For research use only. Not for human or veterinary use, therapeutic use, diagnostic use, food, household, or consumer applications. |
| Responsible party   | Alan Scientific Inc.                                                                                                                |
| U.S. address        | 9031 Shady Grove Court, Gaithersburg, MD 20877 U.S.                                                                                 |
| Contact             | +1 888-757-1116   contactus@alanscientific.com   www.alanscientific.com                                                             |
| Emergency telephone | +1 888-757-1116                                                                                                                     |

## Section 2 - Hazard(s) Identification

|                          |                                                                                                                                                    |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| OSHA HCS classification  | No product-specific OSHA/GHS classification assigned in this draft based on the public information reviewed; toxicological data may be incomplete. |
| Signal word              | Not assigned in this draft                                                                                                                         |
| Hazard statements        | No specific GHS hazard statements assigned in this draft. Handle as a research chemical with incomplete toxicological characterization.            |
| Pictograms               | None assigned in this draft                                                                                                                        |
| Precautionary statements | Avoid breathing dust. Wash thoroughly after handling. Wear suitable gloves and eye protection. Use adequate ventilation.                           |
| HNOC                     | None specifically identified in the information reviewed.                                                                                          |
| Unknown acute toxicity   | Product-specific acute-toxicity data may be unavailable; see Section 11.                                                                           |

## Section 3 - Composition / Information on Ingredients

|                                |                                                                                      |
|--------------------------------|--------------------------------------------------------------------------------------|
| Substance / mixture            | Substance                                                                            |
| Chemical name                  | Fmoc-L-4-Pyridylalanine                                                              |
| CAS No.                        | 169555-95-7                                                                          |
| Molecular formula              | C <sub>23</sub> H <sub>20</sub> N <sub>2</sub> O <sub>4</sub>                        |
| Molecular weight               | 388.42 g/mol                                                                         |
| Purity / concentration         | Product-specific; refer to Certificate of Analysis (COA).                            |
| Hazard-contributing impurities | No additional hazard-contributing impurities identified in the information reviewed. |

## Section 4 - First-Aid Measures

**Inhalation:** Move to fresh air. Obtain medical attention if symptoms occur or persist. **Skin contact:** Remove contaminated clothing and wash thoroughly with soap and water. **Eye contact:** Rinse cautiously with water for several minutes; remove contact lenses if present and easy to do. Continue rinsing and obtain medical advice if irritation persists. **Ingestion:** Rinse mouth. Do not induce vomiting unless directed by medical personnel. Obtain medical advice if unwell. Treat symptomatically and supportively.

## Section 5 - Fire-Fighting Measures

**Suitable extinguishing media:** Use water spray, alcohol-resistant foam, dry chemical, or carbon dioxide as appropriate for the surrounding fire. **Specific hazards:** Carbon oxides and product-dependent nitrogen, sulfur, phosphorus, halogen or other decomposition products may form during combustion or thermal decomposition. **Firefighter protection:** Wear self-contained breathing apparatus and appropriate protective equipment when conditions warrant.

## Section 6 - Accidental Release Measures

Avoid dust formation and inhalation. Provide ventilation and use appropriate personal protective equipment. Collect dry material carefully without generating dust and place in a suitable closed container for disposal. Prevent unnecessary release to drains or the environment.

## Section 7 - Handling and Storage

Handle using good laboratory practice. Avoid inhalation of dust and unnecessary contact with skin and eyes. Keep container tightly closed and protect from contamination and moisture. Store according to the product label and lot-specific COA/MSDS; use any supplier-recommended refrigerated, frozen, light-protected or inert-atmosphere condition where applicable.

## Section 8 - Exposure Controls / Personal Protection

|                                     |                                                                                                                                                                  |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Occupational exposure limits</b> | No substance-specific OSHA PEL or ACGIH TLV identified in the reviewed information.                                                                              |
| <b>Engineering controls</b>         | Use general laboratory ventilation; local exhaust is appropriate where dust is generated.                                                                        |
| <b>Eye / face protection</b>        | Safety glasses or suitable chemical splash protection.                                                                                                           |
| <b>Skin / body protection</b>       | Suitable chemical-resistant gloves and laboratory clothing.                                                                                                      |
| <b>Respiratory protection</b>       | Normally not required under controlled handling; if dust is generated and ventilation is insufficient, use an appropriate NIOSH-approved particulate respirator. |
| <b>Hygiene measures</b>             | Wash hands after handling. Do not eat, drink or smoke in chemical handling areas.                                                                                |

## Section 9 - Physical and Chemical Properties

|                                   |                                                                              |
|-----------------------------------|------------------------------------------------------------------------------|
| <b>Physical state</b>             | Solid (typical research-reagent form; verify lot-specific COA).              |
| <b>Appearance</b>                 | Solid/powder; lot appearance may vary and should be checked against the COA. |
| <b>Odor</b>                       | No validated product-specific value assigned in this draft.                  |
| <b>pH</b>                         | No data available                                                            |
| <b>Melting point</b>              | No validated Alan Scientific lot-specific value assigned in this MSDS.       |
| <b>Boiling point / range</b>      | No data available                                                            |
| <b>Flammability</b>               | No data available                                                            |
| <b>Flash point</b>                | No data available                                                            |
| <b>Vapor pressure</b>             | No data available                                                            |
| <b>Density / relative density</b> | No data available                                                            |
| <b>Solubility</b>                 | Product-specific; consult technical data/COA if available.                   |
| <b>Partition coefficient</b>      | No data available                                                            |
| <b>Molecular weight</b>           | 388.42 g/mol                                                                 |

## Section 10 - Stability and Reactivity

**Reactivity:** No comprehensive product-specific reactivity data are assigned in this document. **Chemical stability:** Expected to be stable under recommended storage conditions. **Conditions to avoid:** Excessive heat, moisture where relevant, prolonged light exposure where relevant, and conditions inconsistent with the product label. **Incompatible materials:** Strong oxidizing agents and functional-group-specific incompatible reagents unless intentionally used in a controlled synthetic step. **Hazardous decomposition products:** May include carbon oxides and product-dependent nitrogen, sulfur, phosphorus, halogen or other decomposition products.

## Section 11 - Toxicological Information

|                                         |                                                                                                                                               |
|-----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Likely exposure routes</b>           | Inhalation of dust, eye contact, skin contact and ingestion.                                                                                  |
| <b>Acute toxicity</b>                   | No numerical product-specific LD50/LC50 data assigned in this draft; chemical and toxicological properties may be incompletely characterized. |
| <b>Skin corrosion / irritation</b>      | See Section 2; otherwise no validated product-specific data assigned.                                                                         |
| <b>Eye damage / irritation</b>          | See Section 2; otherwise no validated product-specific data assigned.                                                                         |
| <b>Respiratory / skin sensitization</b> | No validated product-specific sensitization data assigned in this draft unless stated in Section 2.                                           |
| <b>Germ cell mutagenicity</b>           | No data available.                                                                                                                            |
| <b>Carcinogenicity</b>                  | Not identified here as a listed carcinogen by IARC, NTP or OSHA based on currently reviewed information.                                      |
| <b>Reproductive toxicity</b>            | No data available.                                                                                                                            |
| <b>STOT - single exposure</b>           | See Section 2; otherwise no data available.                                                                                                   |
| <b>STOT - repeated exposure</b>         | No data available.                                                                                                                            |
| <b>Aspiration hazard</b>                | Not applicable to the supplied solid based on available information.                                                                          |
| <b>Additional information</b>           | Chemical and toxicological properties may not be fully characterized. Handle using good laboratory safety practice.                           |

## Section 12 - Ecological Information

No complete product-specific ecotoxicity data are assigned in this document. Persistence, degradability, bioaccumulation and mobility data are limited or unavailable. Avoid unnecessary environmental release.

## Section 13 - Disposal Considerations

Dispose of product, residues and contaminated packaging in accordance with applicable federal, state and local requirements. Do not mix with incompatible waste streams. Handle uncleaned containers as product residue.

**Section 14 - Transport Information**

|                              |                                                                                                                                       |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| <b>Transport status</b>      | No dangerous-goods classification assigned in this draft; verify shipment-specific supplier, carrier and jurisdictional requirements. |
| <b>UN number</b>             | Not assigned in this draft unless a regulated classification is confirmed.                                                            |
| <b>Proper shipping name</b>  | Not assigned.                                                                                                                         |
| <b>Hazard class</b>          | Not assigned.                                                                                                                         |
| <b>Packing group</b>         | Not assigned.                                                                                                                         |
| <b>Environmental hazards</b> | No transport-specific environmental classification assigned in this draft.                                                            |
| <b>Special precautions</b>   | Use secure, closed packaging appropriate for laboratory chemicals and verify carrier requirements before shipment.                    |

**Section 15 - Regulatory Information**

|                                        |                                                                                                                                                                                                                               |
|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>OSHA HCS</b>                        | Prepared with consideration of the OSHA Hazard Communication Standard (29 CFR 1910.1200); classification in Section 2 reflects the currently reviewed information and may require revision against the upstream supplier SDS. |
| <b>Other regulatory considerations</b> | Users and importers are responsible for confirming TSCA, state, local and jurisdiction-specific requirements for the specific transaction and use.                                                                            |

**Section 16 - Other Information**

|                                       |                                                                                                                                                                                                                                                                                                           |

| <b>Revision</b>                       | 1.0                                                                                                                                                                                                                                                                                                       |
| <b>Date of preparation / revision</b> | 2026-09-08                                                                                                                                                                                                                                                                                                |
| <b>Revision summary</b>               | Alan Scientific MSDS prepared for Fmoc-L-4-Pyridylalanine (AS4230) within the Newly Launched Small-Molecule Specialties optimization batch using the no-logo 16-section format.                                                                                                                           |
| <b>Data / assessment basis</b>        | Alan Scientific live product identity plus currently reviewed public chemical/supplier information. This document is a research-use draft; final external release should remain aligned with the lot-specific upstream supplier SDS and COA, especially for hazard, storage and transport classification. |
